

NIRBHAY SINGH

Full-Stack Developer

nirbhaysingh4585@gmail.com | +91-7526005523 | linkedin.com/in/nirbhay-singh-79b60132a | github.com/Nirbhay554

EDUCATION

Indian Institute of Information Technology, Dharwad 2024 – 2028

- B.Tech in Electronics & Communication Engineering (ECE)

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, C++, HTML5, CSS3, SQL

Frontend: React.js, Next.js 14, Redux Toolkit, Vite, Tailwind CSS, Framer Motion

Backend: Node.js, Express.js, REST APIs, WebSockets

Databases: PostgreSQL (Neon), MongoDB, Supabase, JWT Auth

AI / Voice: LiveKit Agents, Twilio, Deepgram STT, ElevenLabs TTS, Gemini API, Web Speech API

Tools & Deployment: Git, GitHub, Vercel, Render, CI/CD

DSA: 125+ LeetCode problems — Arrays, Linked Lists, Binary Search, Recursion, Strings

PROJECTS

AI Mock Interview Platform | React • Node.js • Supabase • Gemini API

- Built a full-stack AI interview prep platform with real-time speech-to-text via the Web Speech API for end-to-end domain-specific mock interviews.
- Integrated Google Gemini 1.5 Flash to dynamically generate context-aware questions and deliver structured AI feedback with improvement tips.
- Implemented Supabase Auth with Google OAuth and a PostgreSQL schema for interview history and performance analytics, with a session review dashboard.

AI Voice Calling Agent | LiveKit Agents • Twilio • Deepgram • ElevenLabs • Claude API

- Architected an outbound AI voice agent for school sales pitches that converses fluently in Hinglish, handles objections in real time, and books meetings autonomously.
- Integrated Twilio telephony with LiveKit Agents for low-latency call handling, Deepgram for speech-to-text, and ElevenLabs for natural TTS output.
- Designed a pricing and negotiation logic layer, including advance-payment terms, directly into the agent's conversation flow.

Task Management Dashboard | Next.js 14 • TypeScript • Redux Toolkit • PostgreSQL (Neon)

- Engineered a full-stack task management platform with role-based views, drag-and-drop status updates, and real-time state sync using Redux Toolkit.
- Built a normalized PostgreSQL schema on Neon with type-safe queries and RESTful APIs consumed via TypeScript interfaces end-to-end.
- Deployed a production-grade build on Vercel with environment-based configuration and optimized server/client rendering.

Job Aggregator Platform | React • Node.js • MongoDB • JWT • RapidAPI

- Developed a full-stack job board aggregating listings from 50+ sources via the JSearch/RapidAPI, with filters for role, location, and experience level.
- Built JWT-based authentication and MongoDB-backed persistence for saved jobs, profiles, and search history; deployed via CI/CD on Vercel.

EXPERIENCE

Freelance Full-Stack Developer *Self-Employed — Azamgarh, UP*

- Identified and pitched local businesses (schools, hotels, colleges) with no digital presence; delivered modern React-based websites deployed on Vercel.
- Owned the full project lifecycle — requirement gathering, design, development, deployment, and ongoing maintenance — building long-term client relationships across multiple local businesses.

ACHIEVEMENTS & CERTIFICATIONS

- Solved 125+ LeetCode problems across Arrays, Linked Lists, Binary Search, Strings, and Recursion.
- Completed Colt Steele's Web Developer Bootcamp — full JavaScript, Node.js, Express, and MongoDB curriculum.
- Built and deployed 6+ full-stack projects independently, spanning AI integrations, real-time systems, and production deployments on Vercel and Render.
- Active freelancer on Fiverr delivering React-based web solutions to local and remote clients.
